Coming from Germany, I joined UCLA almost two decades ago and ran a coastal time-series station in the Santa Monica Bay for over 10 years. Since then, I’ve focused on teaching in UCLA, Hawaii, and online universities. Teaching online has a lot of challenges, but it also provides many advantages! In Summer Session A, I’m teaching classes that acknowledge and accommodate these challenges. Check out the courses below!

**ENROLL TODAY!**

**AOS 1/1L**  
**Climate Change: From Puzzles to Policy**  
Gain an understanding of human influences on climate over the past 150 years, and how they are predicted to shape the climate of this century

**AOS M105**  
**Introduction to Chemical Oceanography**  
Learn the basics of the chemical composition of seawater, the processes that govern it, and solutions to climate change effects on the ocean
